

## Silk Scarf

The perfect addition to any outfit, this custom silk scarf is bursting with fashionable flair.

### HOW TO MAKE IT

#### STEP 1

Draw your chosen design onto a 22" x 22" silk scarf with a watersoluble pencil. (Note: Pencil marks will wash out when resist is removed.)

#### STEP 2

Build a square frame using 23" long stretcher bars. Stretch the scarf taut over the frame and pin it down.

#### STEP 3

Apply Jacquard Removable White Waterbased Resist along the pencil marks with a brush. If you'd prefer a metallic look, use Permanent Gold resist, which will leave a gold outline.

#### STEP 4

Paint the design with Jacquard Dye-Na-Flow Fabric Colors. Use the paint like you would watercolor — apply small amounts and allow the ink to spread on surface. Dilute them with water to reduce color intensity or to create a wash for the background.

## Silk Scarf (HOW TO MAKE IT continued)

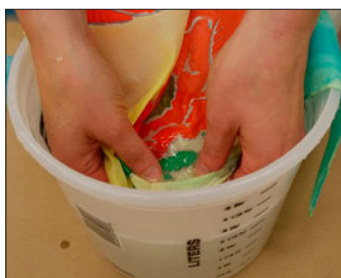

### STEP 5

Let dry. You can use a heat gun to speed up the process. Carefully remove the pins and release the scarf from the stretcher bars.

### STEP 6

Put your iron on the silk setting. Iron all the colored areas to set the ink permanently.

### STEP 7

After ironing, pour a tiny amount of liquid soap into quart-sized bucket of water. Rinse scarf with soapy water. If using removable resist, remove by gently agitating in water until all resist is removed. Let dry. Once again, a heat gun can be used to speed up the process.

### STEP 8

When the scarf is dry, iron it again to remove wrinkles.
