

## Tape It and Spray It Shirt

Craft a masterpiece of a T-shirt — using only four materials!

### HOW TO MAKE IT

#### STEP 1

Use painter's tape to create a design anywhere you want on the T-shirt. You can apply the tape in straight lines or curves. Or cut details into the tape with scissors before sticking it down. Experiment with different techniques.

#### STEP 2

Spray Liquitex Professional Spray Paint over your design. This paint comes in almost every color imaginable! It's acrylic paint in spray form, so it's permanent and washable. Let dry.

#### STEP 3

Remove tape. Now go out and flaunt your wearable masterpiece!
