

Resin Spoon Ornament

Preserve memories or just make a sparkly Christmas ornament using a spoon, clear resin, and a photo. It also makes an adorable pendant!

HOW TO MAKE IT

STEP 1

Bend back the handle of the spoon.

STEP 2

Using a handsaw or coping saw, cut the handle off just above the bowl. Use pliers to create a loop.

STEP 3

Mix the casting resin and catalyst according to package instructions.

STEP 4

Position your photo or other items on the bowl of the spoon. Pour casting resin on top. Do a single casting or create layers of interest. Let harden overnight. Finish with a hanging ribbon.
