

Cut Canvas Art

A pretty and versatile decoration! Just cut an original design into a framed canvas and add decorative paper to create a colorful background. Switch the paper as desired to suit your mood or décor.

HOW TO MAKE IT

STEP 1

Using a marker, draw a design onto the back of the canvas. Freehand the design or use a stencil.

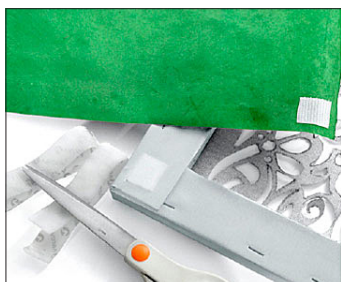

STEP 2

Use a craft knife to carefully cut out the design.

STEP 3

Spray the front of the canvas with a metallic spray paint. Let dry.

STEP 4

Apply a 1" square of hook-and-loop fastener to each corner of the canvas. Add the matching piece of hook-and-loop to the corners of a piece of decorative paper. Make sure the paper is slightly smaller than the canvas and that the fasteners line up. You can change the background paper as often as you like!
